Contents Volume 68, 2004

VOL. 68, NOS. 1–2

Noninvasive monitoring of DNAPL migration through a saturated porous medium using electrical impedance tomography
J.E. Chambers, M.H. Loke, R.D. Ogilvy and P.I. Meldrum 1
Study on anisotropy of effective diffusion coefficient and activation energy for deuterated water in compacted sodium bentonite
S. Suzuki, H. Sato, T. Ishidera and N. Fujii 23
DNAPL remediation with in situ chemical oxidation using potassium permanganate. Part I. Mineralogy of Mn oxide and its dissolution in organic acids
X.D. Li and F.W. Schwartz 39
The use of laboratory-determined ion exchange parameters in the predictive modelling of field-scale major cation migration in groundwater over a 40-year period
H.F. Carlyle, J.H. Tellam and K.E. Parker 55
An analytical solution for estimating percolation rate by fitting temperature profiles in the vadose zone
C. Shan and G. Bodvarsson 83
Modelling the solute transport under nonequilibrium conditions on the basis of mass transfer equations
E. Worch 97
Bioremediation of chlorobenzene-contaminated ground water in an in situ reactor mediated by hydrogen peroxide
C. Vogt, A. Alfreider, H. Lorbeer, D. Hoffmann, L. Wuensche and W. Babel 121

VOL. 68, NOS. 3–4

Non-aqueous phase liquid spreading during soil vapor extraction
T.J. Kneafsey and J.R. Hunt 143
Coupled modeling of cement/claystone interactions and radionuclide migration
L. De Windt, D. Pellegrini and J. van der Lee 165
In situ anion diffusion experiments using radiotracers
M. Jansson and T.E. Eriksen 183
Modeling of non-reactive solute transport in fractured clayey till during variable flow rate and time
P.R. Jørgensen, T. Helstrup, J. Urup and D. Seifert 193
A cation exchange model to describe Cs^+ sorption at high ionic strength in subsurface sediments at Hanford site, USA
C. Liu, J.M. Zachara and S.C. Smith 217
Operator-splitting procedures for reactive transport and comparison of mass balance errors
J. Carrayrou, R. Mosé and P. Behra 239
DNAPL remediation with in situ chemical oxidation using potassium permanganate: II. Increasing removal efficiency by dissolving Mn oxide precipitates
X.D. Li and F.W. Schwartz 269
